Bridge

When doing 1 through 10 multiplying 9
Teach you a short cut that blow your mind
All you gotta do is take one from the number
That times with the 9
Put it in the 10s place takes no time
Now just subtract
9 and that number throw it to the back
Back meaning 1's place
Yes y'all that's it, let's try it out with the 6
1 from 6, that equals 5
Put it in the 10's place, yeah that's right
Now just gotta do 9 – 5, 4
Put it in the ones place for sure
That's 54, one more time
Just take one from the number times with the 9
Put it in the 10's place now just subtract
9 and that number and throw it to the back hey!

Chorus
