

KEEP ADDING 11 – 11’S SONG

Verse1

11 x 0 is 0 nada
Any number times 0 yo is 0
11 x 1, 11
Double the 1 that's how you end with 11
11 x 2, 22
Double the 2 that's how you end up with 22
11 x 3, 33
Double the 3 that's how you end up with 33
11 x 4, 44
Double the 4 that's how you end up with 44
11 x 5, 55
Double the 5 that's how you end up with 55
11 x 6, 66
Double the 6 that's how you end up with 66
11 x 7, 77
Just double up the 7 when multiplying by 11

Chorus (x2)

When smaller than 10 what should you do
Just double up the one that's times with 11
If not, ain't no stressin'
You can skip count and keep adding 11

Verse 2

11 x 8, 88
Double the 8 that's how you end up with 88
11 x 9, 99
Double the 9 that's how you end up with 99
Smaller than 10, what should you do?

Just double up the one that's times with 11
If not, ain't no stressin'
You can skip count and keep adding 11
If it's bigger than 9, can't double up
Want to know the answer follow us
11 x 10 that is 110
Say it again 11 and 10 is 110
11 x 11, 121
Come get some 11 and 11, 121
11 x 12 that's 132, learnin' 11's so cool

Chorus (x2)

When it's bigger than 9, yo I got a lil' trick don't shake
Just throw the last digit in the 1's place
Then add the two numbers, throw it in the 10's place
10 or bigger throw the last digit in the 10's place
Then add one to the original number
That's in the 10's place
Then drop it to the hundreds place
If you didn't, add 1 then drop
That number in the 10's to the hundreds place
Let's try a problem out so watch
11 x 15 just need 1 and 5 in the 1's place yes
Put the 5 add 1 + 5 you'll get 6
Throw it in the 10's place almost it
Then drop the 1 in the hundreds that's right
And the product is 165 yeah

Chorus (x2)
